Broodmare Information Sheet

Does the horse have any known or previous soundness issues: YES / If yes describe:

Sustained a suspected ligament injury jumping in wet conditions resulting in retirement from competition.

Has your horse had colic: / NO If yes, when: _____

Please describe your horses temperament:

Bella is a little pocket rocket , who thinks she is 17hh - she had a huge heart and “try” as a competition horse and loved to win.

She is easy to handle but can occasionally be a little nippy , was more protective of her first of her foal , quite relaxed and easygoing with her second. She likes to be left alone at feed time , but doesn't fight with other horses , will always be the second or third in the paddock pecking order.

She is easy to paddock with other horses and was an excellent , (bossy but kind) Nanny mare during weaning.

Any Additional Information:

Bred by Clarke Johnstone we purchased Bella as a 4yr old . A fantastic compact mare with a lot of blood and an excellent jumping technique , she would always fight for a clear round .

Has been registered , DNA verified and assessed with “Premium status” in NZWA Mare Studbook by a German Assessor “ Typey Feminine Mare “ - Scoring 8.0 for Overall Type.

We are very happy with her two foals ,they are both athletic strong types with excellent canters and showing good size - but due to a reduction in breeding stock Bella is available to become an asset to another broodmare herd .
